

Healthcraft Covid-19 Checklist

Covid-19 Checklist

Healthcraft are committed to ensuring we play our part in limiting the spread of Covid-19 as well as delivering our projects on time. We have implemented several initiatives to reduce risk and give you peace of mind that infection controls are in place and that we will never miss your deadline.

Delivery to all states continues

Healthcraft can deliver furniture across all state and territory borders unimpeded. We engage national freight carriers who have authorisation to cross state borders. Our carriers have strict Covid-19 infection control procedures in place.

Flu Shot certification

All personnel in contact with facility have had Flu Shots including delivery drivers and Healthcraft staff members. Certification available on request.

Business Continuity

Healthcraft factories are predominantly in QLD which has lower instances of COVID-19. This decreases the risk of factories being shut down due to outbreaks negatively impacting your project delivery timing. With multiple factories at our disposal, should a factory be closed due to an outbreak, we may be able to shift production locations to ensure our projects are delivered on time and infection free.

Lower risk of contamination

Deliveries have lower risk of Covid-19 contamination because the majority of our furniture is produced in Queensland, where there are fewer instances of Covid-19.

Local project managers to oversee delivery and placement

In addition to the Healthcraft staff we have engaged Victorian and NSW based project managers to oversee the placement of furniture for major projects and ensure our seamless service.
